Page 18

Schedule RC-C, Part II is to be reported only with the June Report of Condition.

Report the number and amount currently outstanding as of June 30 of business loans with % riginal amounts+of \$1,000,000 or less and farm loans with % riginal amounts+of \$500,000 or less. The following guidelines should be used to determine the % riginal amount+of a loan: (1) For loans drawn down under lines of credit or loan commitments, the % riginal amount+of the loan is the size of the line of credit or loan commitment when the line of credit or loan commitment was most recently approved, extended, or renewed prior to the report date. However, if the amount currently outstanding as of the report date exceeds this size, the % riginal amount+is the amount currently outstanding on the report date. (2) For loan participations and syndications, the % riginal amount+of the loan participation or syndication is the entire amount of the credit originated by the lead lender.

(3) For all other loans, the %riginal amount+is the total amount of the loan at origination or the amount currently outstanding as of the report date, whichever is larger.

# Schedule 25 RC-R - Regulatory Capital

Banks are not required to risk-weight each on-balance sheet asset and the credit equivalent amount of each off-balance sheet item that qualifies for a risk weight of less than 100 percent (50 percent for derivatives) at its lower risk weight. When completing items 34 through 54 of Schedule RC-R, each bank should decide for itself how detailed a risk-weight analysis it wishes to perform. In other words, a bank can choose from among its assets and off-balance sheet items that have a risk weight of less than 100 percent which ones to risk-weight at an appropriate lower risk weight, or it can simply risk-weight some or all of these items at a 100 percent risk weight (50 percent for derivatives).
